

Intro2SE – Testing – GroupID

Project Name

The student team is required to complete the **Software Testing** documentation for the assigned course project, following the attached template.

Software Engineering Department
Faculty of Information and Technology
VNU-HCMUS

Table of Contents

Objectives	1
1 Member Contribution Assessment	2
2 Test plan	3
3 Test cases	4
1.1 <i>List of test cases</i>	4
1.2 <i>Test case specifications</i>	4
1.2.1 Name of Test case 1	4
4 AI Usage Declaration	5
5 Presentation	6

Software Testing

Objectives

This document focus on the following topics:

- ✓ Completing the Software Testing document with the following sections:
 - Test Plan
 - Test Cases
- ✓ Understanding the Software Testing document.
- ✓ This document will be used as input for AI tools to verify the quality of subsequent project artifacts.

All project artifacts must remain consistent and synchronized.

For example, if the project proposal is modified during this phase, a new version of the proposal must be documented.

By the conclusion of the project, all versions of every artifact must be submitted to demonstrate the evolution of your work.

1 Member Contribution Assessment

StudentID 1 – Fullname 1 – Contribution (%)

- Task Evidence: Provide a comprehensive list of tasks managed via Jira (or a similar project management tool). For each entry, include: Task Details: Task name and a descriptive summary of the work performed. Visual Evidence: Clear screenshots that explicitly show the Task Name, Assignee, Status, Assigned Date, and Completion Date.

StudentID 2 – Fullname 2 – Contribution (%)

- Task Evidence

Each task must be assigned to and completed by only one student.

The sum of all student contributions is less than or equal to 100%.

2

Test plan

[Present the project testing plan, clearly stating which testing techniques the team intends to apply and on which objects (functions, documents) of the system the testing will be performed]

3

Test cases

1.1 List of test cases

Provide the name of each test case, the associated feature, and a brief description (if applicable).

Teams are required to test all possible scenarios for each feature.

Test cases should be prioritized, focusing specifically on the 5 most critical features.

Seq	Test case	Feature	Description

1.2 Test case specifications

1.2.1 Name of Test case 1

Test case	
Related feature	
Context	
Input Data	
Expected Output	
Test steps	
Actual Output	
Result	Passed / Failed

4

AI Usage Declaration

Based on the provided AI Usage Guideline document, teams must submit their AI usage declaration here. Students are encouraged to leverage AI tools creatively and effectively in this project.

5

Presentation

Teams are required to record presentation videos of their work using the provided template.

Every team member must participate in the presentation, specifically covering the sections their contributed to the project.

Videos must not exceed 30 minutes.

Please upload your videos to Youtube (set to either Unlisted or Public).

Provide the Youtube links the the field below.
